Summary

Software engineering graduate with hands-on experience building full-stack applications using React/Next.js and FastAPI. Built a production RAG system presented at an international project competition, and shipped features for a startup's AI-powered web platform during a full-stack internship. Strong foundation in REST API design, authentication, relational databases, and integrating LLMs into production systems.

EDUCATION

CYPRUS INTERNATIONAL UNIVERSITY

Bachelor of Software Engineering

Cyprus

July 2026

Programming Coursework: Software Design, Algorithms, Artificial Intelligence, Natural Language Processing

WORK EXPERIENCE

SHAHEEN.AI (startup)

Saudi Arabia , Dammam

FullStack Developer - Intern

Jul 2025 – Sep 2025

- Rebuilt the company's landing page from the ground up using **Next.js**, replacing the outdated legacy site with a faster, fully responsive design across desktop and mobile..
- Developed core features for the company's **AI-powered marketing platform**, enabling **automated content generation and scheduling** that streamlined the client content workflow.
- Implemented **JWT-based authentication** and contributed to **relational database design**, strengthening the platform's security posture and laying the groundwork for scaling to more users.

PROJECTS

RAG-LMX — AI Document Assistant

Graduation Project

- Built a full-stack **Retrieval-Augmented Generation** system for university document Q&A using **Next.js 14 TypeScript** and a **stateless FastAPI** backend.
- Engineered a hybrid retrieval pipeline (**BM25**, **MMR**, cross-encoder reranking, query expansion, MD5-based deduplication) for improved answer relevance and accuracy.
- Implemented **JWT authentication** and **Supabase (PostgreSQL + RLS)** for secure, scalable data access, with **OpenAI** embeddings and **ChromaDB** for vector storage.
- [Project link](#)

Scrolla — Async social feed API

- Built an async social media feed API using **FastAPI** and **SQLAlchemy (async ORM)** with **SQLite/aiosqlite** for persistence
- Implemented JWT-based authentication and user management with **FastAPI-Users**, including registration, login, and password reset flows
- Integrated **ImageKit** as a cloud media CDN for authenticated image/video uploads
- Designed a relational schema linking users to posts with ownership-enforced delete operations and RESTful endpoints for the feed, post creation, and deletion
- [Project link](#)

Technical Skills

Languages: Javascript/Typescript, Python, SQL, HTML, CSS

Technologies : React, Node.js, REST APIs, AWS, FastAPI, Docker

Other: Git/Github, Vscode, MongoDB, Postman API
