Summary

Full Stack Developer with hands-on experience designing and building scalable web applications and dynamic user interfaces. Proficient in both frontend and backend development, delivering efficient, high-performance, and user-friendly solutions. Strong problem-solving skills and a collaborative mindset, focused on producing high-quality software that drives business impact.

EDUCATION

CYPRUS INTERNATIONAL UNIVERSITY

Bachelor of Software Engineering

Cyprus

July 2026

Programming Coursework: Software Design ; Algorithms; Artificial Intelligence, Natural Language Processing

WORK EXPERIENCE

SHAHEEN.AI (startup)

Saudi Arabia , Dammam

FullStack Developer - Intern

Jul 2025 – Sep 2025

- Redesigned and built the company's new landing page from the ground up using **Next.js**, delivering a faster, fully responsive user experience.
- Built core features for an **AI-powered marketing platform**, enabling automated content generation and scheduling for clients.
- Implemented **JWT-based authentication** and contributed to database design, strengthening the security and scalability of the platform's backend.

PROJECTS

RAG-LMX — AI Document Assistant

Graduation Project

- Built a full-stack **Retrieval-Augmented Generation** system for university document Q&A using **Next.js 14 TypeScript** and a **stateless FastAPI** backend.
- Engineered a hybrid retrieval pipeline (**BM25**, **MMR**, cross-encoder reranking, query expansion, MD5-based deduplication) for improved answer relevance and accuracy.
- Implemented **JWT authentication** and **Supabase (PostgreSQL + RLS)** for secure, scalable data access, with **OpenAI** embeddings and **ChromaDB** for vector storage.

Notes App — cloud-based note-taking web application

- Built a full-stack notes app using **React 18** and **Firebase** (Authentication + Firestore) with real-time data sync
- Implemented secure authentication (email/password + Google OAuth) with persistent sessions via React Context
- Architected state management with **React Context + useReducer**, including a debounced auto-save hook to optimize Firestore writes
- Enforced per-user data isolation with scoped Firestore queries and built a responsive, dark-mode UI with **Tailwind CSS**

Technical Skills

Languages: Javascript/Typescript, Python, SQL, HTML, CSS

Technologies : React, Node.js, REST APIs, AWS, FastAPI, Docker

Other: Git/Github, Vscode, MongoDB, Postman API
